

In the Realm of Women

By PENELOPE

Miss McLaughlin, Ottawa, who has been the guest of Mrs. J. H. Shupherd, North Side, leaves today.

Mrs. Glen H. Chubb, 1235 Peace avenue, will not receive on Monday, 21st, nor again this season.

Mrs. Sharpe and the Misses Sharpe, who have been the guests of Mrs. J. H. McLaughlin, leave for their home in Summerside, P.E.I., next Wednesday.

Mrs. Regley Hall will receive on Monday for the last time this season. The address is 727, Eighth avenue northwest.

Mrs. Barclay Stephens, who has been visiting her sister, Mrs. J. E. Dunlop, for the past two weeks, left for her home in Montreal yesterday.

Keen interest is being taken in the rose tea looked for Saturday afternoon in the Schuster schoolroom, to be given by the Edmonton branch of the Canadian Handicrafts Guild. A rose will be the theme of the afternoon. The tea will be given for the benefit of the home of Mrs. George and Marie Lang. Afternoon tea will also be served, and pretty girls will have a candy booth, where sweets will be available.

Mrs. J. A. McKinnon was hostess of a large tea Wednesday afternoon in honor of her mother, Mrs. Sharpe, and her two sisters, the Misses Zilpha and Marion Sharpe, who are guests from Summerside, P.E.I. Attractively decorated with great clouds of yucca and foliage, the reception room provided an effective setting for the charming toilettes of the hostess and the guests of honor. Mrs. McKinnon was in a fine chaperone, trimmed with brocade, satin and touches of ermine and silk. Mrs. Sharpe wore a dress of black net, the over-dress encrusted with lace. Miss Sharpe chose a rather shade of yellow, satin with silver overtones.

The tea room was fragrant with the breath of deep crimson roses grouped in a tall crystal vase. Here Mrs. Whitaker, Mrs. George Egan and Mrs. S. Walker presided, assisted by Mrs. Walter Wilson, Mrs. J. A. McKinnon, Miss McLaughlin and Miss Marion Sharpe. There were about 40 guests present. Little groups congregated on the wide veranda, made the coolest place imaginable with its green chairs and quantities of potted plants and palms, to discuss all things under the sun, including the outcome of the election yesterday.

HUMANITY SOCIETY.
By Edith Page and Marie McKinnon.

We are glad to say Mr. H. H. Brown, the well known criminal lawyer of the firm of Robertson, Dickson & Macdonald, has been appointed prosecuting attorney for the Edmonton Humane Society.

Realizing the great need through our province for the establishment of Humane Societies in outlying cities and towns, and that have been made, from time to time, to assist in their organization. Until recently, we have had no definite organization in our city. The Humane Society has taken in this work and we have from letters received that before long we shall be able to start our Humane Society in fact the only existing one of its kind in Alberta.

Another very good movement on hand which cannot fail to interest the great part of the population. Our city is the cradle and stories to be written by the children of the province. Little groups of children of the Humane Society shall award very handsome prizes. Mr. McLaughlin, president of the city schools, with its realizing the importance and far-reaching consequences of early humane education has done a great deal towards arranging for this competition.

The Edmonton Humane Society has recently affiliated with the Federation of Canadian Humane Societies. The objects of the federation are:

First—Securing of better laws for protection of human beings and animals.

Second—The extension of the Canadian Band of Mercy League.

Third—The extension of the Canadian Band of Mercy League.

Fourth—The extension of the Canadian Band of Mercy League.

Fifth—The extension of the Canadian Band of Mercy League.

SIXTH—The extension of the Canadian Band of Mercy League.

SEVENTH—The extension of the Canadian Band of Mercy League.

EIGHTH—The extension of the Canadian Band of Mercy League.

NINTH—The extension of the Canadian Band of Mercy League.

Third—Assuring of a humane treatment of all other creatures.
Fourth—Assisting in the formation of new societies throughout the Dominion of Canada and providing efficient organization for prompt action in any matters affecting human work in any part of the Dominion.
Fifth—In general, to undertake anything which in the opinion of the federation of its executive will promote and further the interests of the humane work throughout the Dominion of Canada.

Through the activity of the Federation, a movement is on hand to bring about a revision of the criminal laws of 1905. It may interest our readers to learn that through the Edmonton Humane Society this matter has been brought to the notice of Hon. Frank Oliver, Senator Talbot, Major J. S. Sharn, Conservative member for Northern Ontario; Mr. W. Sharpe, M.P. for Montreal, and Dr. Michael Clark, Liberal member of the Red Deer riding.

By what is known in England as the "Humane Society," the man habitually cruel to his horse or dog or any other animal belonging to him may be deprived of it by the court. This is what legislation. Doubtless many oppose it as an interference with personal rights, though it is good law in England, and before long we hope to see such an act passed by our own Dominion representatives.

THE HORSE ACTION.

The hammer of the auctioneer's gavel sold Solid Horse, decorated, silver and gold. The horse is a grand specimen of the breed.

"Tree dollar!" Hal by Heaven, he is a beauty!
One-fifty! "Come, my boy, he's a beauty!"
Stand back, you've gotta mind this whip—sh—sh—sh!

Stand and gaze on them. Though one's heart were stone
It would be hard to cause the tear and moan.

O cities, of your fame and wealth so proud,
Be you this heartless traffic in pain.

Traffic in misery, disease and pain.
Where only laws of righteousness should reign.
So old and tired! They did their very best.
Have they not earned a year or two of rest?

The load that you should do to end their woe
Is by the sleep which anesthetizes their throats!

Bought up by hundreds of engines, tearing life
What is left of a Scant food, such milks, the whip!

Before I wish heaven an answer you will seek
For such initiative to the dumb and weak.

SATURDAY, APRIL 10, 1913.

THE VERDICT

The electors of Alberta voted on Thursday for five years more of efficient and progressive government under Premier Sifton and on the lines indicated in the record, traditions and policy of the Liberal party. They repudiated with equal decision the attempt of a policy-less Opposition to overthrow the Government by the weapons of personal abuse, misrepresentation and slander, and to seize upon the power conferred by any clear declaration as to how or for what it would be used. They likewise expressed with clearness a determination that no verdict from them should be construed as a weakening of the demand for wider markets, or be used to rivet the monopolistic conditions from which they suffer. Mr. Mclellan's move to divide the Province into a north and a south and to sweep the south with the cry that the north was getting all the good things, evidently met the fate it deserved. He did not sweep the south or any other section, and in the new House Government and Opposition members will not be drawn from two defined and hostile districts, nor either party open to the temptation to champion one section at another's expense for the sake of political profit. Neither did the Southern press get anywhere with its "fix Clarke" proposition. So far as the result turned upon the A. and C. W. question—and in certain parts of the Province this was conceded by the Opposition to be the big question—the moral is that the electors prefer to leave whatever fixing has to be done to the man who has fought Clarke for their rights rather than to those who have fought against their rights on behalf of Clarke and the other private interests concerned. On this question, as on that of general administration, Premier Sifton holds a commission straight from the people to do the best in their interests that the circumstances permit, with a remarkably general declaration of confidence that he will worthily discharge the responsibility. In view of this commission, and of the overwhelming consensus of opinion behind it, his high regard, strengthened alike in the Legislature and the country, and he will be able to carry forward the policy he has announced with freedom and vigor. In view of this testimonial congratulations are due to the Premier, to his colleagues, and to those who have stood by him and fought for him the man to meet the situation. They are equally due to the electors whose good sense asserted the calmness which would be betrayed in a victory won by such weapons as were forged by the Southern press, and who saved themselves and the Province from the ill consequences of the action of government under a gentleman who has not developed strength sufficient even to control and direct a small Opposition confronted with unusually favorable opportunities.

A GOOD FIGHTER

Whether Hon. A. G. Mackay or A. F. Ewing is to be the second member for Edmonton in the new Legislature will depend upon the admissibility and complexion of the battles which were fought and which have to be counted before a justice of the peace. It is claimed that a majority of those who were challenged by Conservative scrutineers, and that probably most of them will go to increase Mr. Mackay's vote. As Mr. Ewing is only 115 votes ahead of him, the result is not really to give Mr. Mackay the seat. In

any event he is a splendid run. A stranger to most of the electors when the campaign opened, he plunged into the fight with surprising vigor, worked assiduously for his colleague as for himself, fought a fair fight with sound argument and convincing speech, and if he did not secure a majority of the votes, came within a very close margin of doing so. Should the count of the protested ballots still leave him in the minority, his defeat will be regretted by Liberals very generally in the city and also in those ridings outside in which he addressed meetings on behalf of Liberal candidates. In any event, he has demonstrated that his coming has brought a new recruit of solid ability to the ranks of Liberalism in Edmonton and Alberta, and one who will be heard from in the coming days.

MUD.

Some time ago it was announced that somebody had started to clean out the filters down at the power-house, and that some time or other we might expect to get water with a little less mud in it. Any expectations founded upon this forecast have been bitterly disappointed. The water has got no better, and, worse, and now the taps emit a fluid that would turn the stomach of a camel.

What a thirsty public would now like to know is why this somebody did not start his cleaning operations about three months ago, and so have the filters in readiness at the time when by the history of unnumbered years the water would need filtering. It is also opportune to inquire whether this is the sort of thing we must expect annually so long as we rely upon mechanical filters for the purification of the water supply? If so, the sooner we get started at the installation of a pumping station far enough up stream that sedimentation reservoirs can be provided, the better. And in that event, it does not make much difference whether the cost of the change is in large or small, if the choice is between this stuff and water, we must have water, be the cost what it may.

INNOCENT, AS USUAL.

On election day the Journal patrolled itself approvingly on the back with the reflection that "its endeavor throughout has been to 'fight fairly and to present the case against the administration in a reasonable way.' That, as the solemn and virtuous conclusion to three weeks of steadily studied and unstinted lying, deserves a place among the justifying deliverances of gentlemen about to expiate their offenses on the scaffold.

REPORT TO ARMS URGED.

30,000 Japanese Demand Armed Protest Against United States.

Tokio, April 15.—A demand that the Japanese government resort to arms was hysterically cheered at a mass meeting here last night, to protest against the alien land bill now before the California legislature. Twenty thousand persons assembled and listened to addresses by various orators, who, however, are not affiliated with any organization, and the younger chauvinists. The speakers also denounced the submissive attitude of the government.

The responsible newspapers of Tokio, in commenting editorially on the meeting, denounced the proceedings as undignified and unworthy of the nation, describing them as merely an outlet for the unbridled fanaticism, incited by political demagogues.

To Insure Morgan Art Treasures.

New York, April 15.—Negotiations have been for the placing in London of a large amount of insurance on the Morgan art treasures. It is estimated that the total insurance will probably exceed \$100,000 covering works and manuscripts now in the private library in Madison avenue during their transit to the metropolitan museum and while there, as well as the collection now in the museum.

Garmont Workers' Strike Settled.

Boston, April 15.—The last of the garment workers' strikes which have troubled that industry in this city for the past ten weeks, was settled last night when representatives of the Men's Garment Workers' union voted to accept the terms of an agreement which was reached yesterday. The strikers were practically all their demands. A working week of 52 hours, a reduced rate of overtime of 100 per cent at least \$1 a week is given each

Correspondence

FURTHER EXPLANATION OF TEMPERANCE POSITION.

Editor Bulletin:

Sir—Permit me to say through the Bulletin, regarding the statements made by Rev. P. A. Parrott in your issue of April 11th, concerning the attitude of the Grand Temperance Society with regard to the candidature of Mr. J. H. Stanger.

The statements were made after careful thought and consultation with the Grand Executive Committee. Mr. Stanger, Mr. Harry Bell, and the Past Elector of Superintendence, Mr. W. J. Bell, and many other temperance workers, as Grand Secretary, fully endorse the position of the Grand Executive Committee, knowing that the Grand Temperance Society is a body never divided, and that the attitude of our representatives which called for the renunciation from many earnest temperance workers that I considered would not be detrimental to the future welfare of our cause and order in Edmonton, and the province at large. Mr. Stephen Brown, Grand Treasurer, in taking exception to the remarks of Mr. Parrott in a later issue of your paper, knew full well that the Grand Executive Committee in Calgary at the close of the annual session and decided to reach the grand assemblage to assume their respective duties, and they were requested to consult with the Grand Executive Committee and Grand Secretary on all matters of importance. The statements made by Mr. Parrott in your issue of April 11th, were made by a member of the order to use his franchise as a private citizen, and not in the name of the province, the city and the order.

My personal attitude in the present crisis has been fully criticized by some temperance workers, and I have reason to think that I have done so. I consider the proper stand, and I mean to retain it, and I consider the cause has suffered an irreparable loss through the inadvisability of the renunciation of the committee of 100 in bringing out a candidate without the sanction of the majority of its members, and whatever the Conservative party may gain or the Liberal party lose for your cause through the action of Mr. Stanger as a third party, I feel with you that the cause of prohibition will be crushed and bleeding in the peaceful state for many years to come and the earnest efforts of many enthusiastic temperance workers is destroyed.

Yours truly,

P. W. ROBERTSON,

721 Jasper Ave.

SUFFRAGETTES WOULD BURN STANDARD OFFICE

Millions Plotting Some Sort of Reception Against Newspaper Which Has Persistently Waged Campaign Against Methods Adopted by Them.

London, April 15.—The authorities of Scotland Yard have received information of a plot by suffragettes to set fire to the offices of the Standard. Littered letters bearing the address of some prominent supporters of the outrage movement were sent out on Monday to a number of militants, inviting them to attend a private and confidential gathering at a bank square, filled up in handwriting, according to the object of the meeting was to consider what steps could be taken to bring reprisals upon the Standard for its persistent hostility toward militant. The reprisals considered were the setting on fire of the printing and publishing offices of the Journal, which are in Bow Lane, a narrow alley, running northward from Fleet street.

Realizing the terrible risk of life, and the destruction of property that must attend such an occurrence, some of the persons who learned of it disclosed the conspiracy. The crime was to be committed with a gasoline bomb, soaked in petrol, were to be used as fire balls, and exploded near the entrance to the Standard building, so as to be able to ensure the fire getting a rapid and easy hold of the buildings.

What seems to have been a deliberate suffragette attempt to wreck a train on the Great Southern railway was discovered yesterday just before the 1.10 express from London passed through Hinton. Junction points were found wedged with stones and a postman, while waiting for the express to pass, is said to have seen a young woman and a young man on the railway embankment.

Lord Roberts to Speak.

Leeds, England, April 15.—Ten thousand applications have been received for seats in the town all night, when Lord Roberts, advocate of national military service, a Commander-in-Chief, will be present to discuss those unable to get in. Lord Roberts arrived here last night, and amidst cheering crowds in a carriage drawn by a gun team with territorial military officers as outriders.

New Governor of Alaska.

Washington, April 15.—Major J. E. A. Strong, of Juneau, has been selected for appointment as governor of Alaska, to succeed Walter E. Clark, resigned. Major Strong's appointment will be sent to the senate possibly tomorrow. Major Strong is the editor and publisher of the Alaska Daily Mirror at Juneau. He has been a resident of Alaska for four years and formerly published newspapers in Fairbanks and Nome. For many years he was a newspaper man in California and Washington. For appointment of the governor of the territory he was elected by the Alaska Daily Mirror, a newspaper published in Fairbanks and Nome. For many years he was a newspaper man in California and Washington. For appointment of the governor of the territory he was elected by the Alaska Daily Mirror, a newspaper published in Fairbanks and Nome.

Report is Exaggerated.

Vancouver, B.C., April 15.—D. McNeill, a member of the Canadian Pacific Railway, is here from Vancouver. When he arrived and of course he was not a member of the railway, he said: "The report is greatly exaggerated."

Are You Afraid to Make Money?

NO DOUBT you will answer in the negative; yet it is a fact that a great many people are afraid to try to make money, insisting that there is a lack of opportunities. The truth of the matter is that such people lack the good, honest, healthy desire to help themselves.

You Can Help Yourself

and make money if you buy well selected real estate in Edmonton. There are many things to bear in mind, however, in choosing an investment, such as location with reference to principal streets; distance from the business centre and a car line; chances for development; size of lots; prices and terms.

KING EDWARD PARK ADDITION

is a safe and sound investment and is the place to buy BECAUSE

It is on the Three Mile Circle

It is on Whyte Avenue (99 ft. wide)

It is Near a Car Line in Operation.

Every Lot is Within 3 Blocks of Whyte Ave.

Lots are Full Size, 33x130 feet.

The Price is Low and Terms Easy.

As proof of the merits of King Edward Park Addition, purchasers are building their homes there. Several houses are now occupied and many others are under construction.

Price Only \$200 Per Lot and up.

Terms Over Two Years at 7 Per Cent.

BALKAN SITUATION SHOWS IMPROVEMENT

Restoration of Peace Cannot Now Be Long Delayed, and Paris Stock—Fighting of Money Helps Some.

Paris, April 15.—Rapid improvement continues in the Balkan situation. With the troublesome Sout problem out of the way, no serious remains which could much postpone the restoration of peace. Therefore the bulls have tried this week to stir up a speculative spirit among the outsiders.

Balkan stocks were bid up aggressively under the pretext that an enormous volume of impending new

currency issue, in conjunction with dearer money, will result in an excellent year for them. But Tinsol, gold mines, and Russian industries were also named up.

The public, however, shows no disposition as yet to return to the stock market. Too many false stirrings of late have made people cautious. Another starting factor for money, which shows no signs of easing, Paris, which is not a particularly attractive market, is now at a 4-1/2 per cent. An issue of 150 million of the Japanese five per cent. short term note will be offered here next week.

Easy to Comb His Hair.

Richard Carlo, says that owing to the stiffness of his hair he doesn't have to comb his hair until he has reached the back of his head.

MUSIC—Singing of Haydn's "Creation" Feature Next Week

GREAT PRESENTATION OF HAYDN'S MASTERPIECE

Main feature will have a great first week when Haydn's masterpiece, "The Creation," is given by the combined choruses of the First Presbyterian church choir and the Strathcona Choral Society, numbering about 100 voices, under the leadership of Mr. E. C. Cox and Capt. W. H. Watts. The result should be unusually fine. The recital will be held next Thursday evening in the First Presbyterian church and on Friday evening in the Metropolitan church. In the First Presbyterian church recital Capt. Watts will be the conductor, and Mr. V. P. Hunt accompanist, while for the South Side recital Mr. Cox will take the conducting position, and Mr. Watts will be accompanist.

Added to the unusually strong choruses, some effective solo work will be heard. Mr. Cox has been fortunate in securing the services of Miss H. H. Haggis, Miss Helen Hughes, Miss Letta Fleming, Mr. David Jones, Mr. E. H. Hutterworth and Mr. J. Hayden Morris.

The following is the detailed arrangement of "The Creation":

Part I—Introduction—Representation of Chaos.
Recit.—In the Beginning—Raphael Chorus—And the Spirit of God.
Recit.—And God saw the light.

Part II—New World.
Chorus—Disappearing, Cursing Hiss.
Recit.—And God said, Let there be light.
Chorus—And there was light.

Part III—The World.
Chorus—Rolling in Foaming Billows.
Recit.—And God said, Let there be earth.
Chorus—And there was earth.

Part IV—The World.
Chorus—And the Heavens were created.
Recit.—And God said, Let there be light.
Chorus—And there was light.

Part V—The World.
Chorus—And God said, Let there be water.
Recit.—And God created great whales.

Part VI—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part VII—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part VIII—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part IX—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part X—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part XI—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part XII—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part XIII—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part XIV—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part XV—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part XVI—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part XVII—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part XVIII—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

MARY C. MURRAY—When singing the role of Edith Adams in "The Prince of Pines," here the last half of the work.

Part I—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part II—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part III—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part IV—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part V—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Ernesto Blandina, the great Italian tenor, was offered the privilege of free tuition by this noted master in recognition of his unusual talents. Mr. Blandina accepted, and spent some years with this great teacher, first as a daily pupil, and afterwards as an assistant teacher, becoming in this wise a master of the method of Lombardi, which Blandina has since made a worthy exponent.

Mr. Blandina then came to Italy to study and perfect himself with such success that he was engaged to sing the leading baritone part in "Scarlatti, Carmen, Lucia and Padma." Upon his return Mr. Blandina took up residence in New York City, devoting most of his time to the concert field. With a voice of rare quality and phenomenal range, extending from low baritone to a robust tenor field, which he sings with more ease and brilliancy than most tenors, he has fairly earned his place as a great artist. Indeed it has been said that he is the "D. P. of the vocal world" in fluency and versatility, and a "Punch" given in natural ability and temperament.

As a composer Mr. Blandina is known as the writer of some of the best songs of the present day, and on the subject of an exceptional artist and musician. Among the better known of Mr. Blandina's compositions are the following:

Part I—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part II—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part III—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part IV—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

Part V—The World.
Chorus—And God created great whales.
Recit.—And God created great whales.

MOVING PICTURES THAT TALK ARE THE WORK OF EDISON

(Continued From Page Nine)

Mr. Edison, however, has not the sketches and space to this effect.

There are some possible ways of harnessing the photograph and kinetoscope together so as to make talking pictures. These are:

The kinetoscope sent over the wires, with the film, Mr. Edison's plan, which is the most practical, is to place the camera and the kinetoscope in the same room where the draughtsman works, and to have the camera and the kinetoscope connected by a wire.

Mr. Edison's plan, which is the most practical, is to place the camera and the kinetoscope in the same room where the draughtsman works, and to have the camera and the kinetoscope connected by a wire.

"Shadows Before"

The people who are making money in Western Canada today are those who keep a sharp lookout for the "shadows," that prove great events. It is a remarkably easy matter if only you have good common sense and faith in the future.

The "shadows" that harbor enormous development in the North Pacific section of Western Canada are as plain as the clouds in the sky. They are even plainer now than they were three years ago, when Prince Rupert, the bustling, fast growing terminus of the Grand Trunk Pacific, was first offered to investors. A few hundred dollars brought a lot

in Prince Rupert in those days. Today it takes a good many thousands, to buy the same lots, and the first owners are driving smart cars as a result. You can make just as good an investment today; you have the very same opportunity based on the same conditions, in Port Edward, B.C.

This advertisement only points you to the fact that you should know more about this great North Pacific country. It cannot convince you that you should invest. We don't expect or want it to. We want you to investigate, inquire, learn all the facts you can. We'll help you in every way possible.

There were two different sets of diagrams for two distinct problems were to be solved. As Edison sat in his study he saw in imagination a photograph as improved, no active in its meaning, that it could stand as a photograph. He saw also this improved photograph harnessed to a kinetoscope by an apparatus that he had designed in perfect detail with each other, both in receiving and in transmitting. He saw also this improved photograph harnessed to a kinetoscope by an apparatus that he had designed in perfect detail with each other, both in receiving and in transmitting. He saw also this improved photograph harnessed to a kinetoscope by an apparatus that he had designed in perfect detail with each other, both in receiving and in transmitting.

Alaska. Prince Rupert cannot accommodate the industries that are seeking locations in this wonderful field. This is a fact well known. Port Edward, adjacent to Prince Rupert but situated on the mainland and on the main line of the G.T.P., is the harbor and the pier wharf room and the tonnage to fill the bill completely. Development work is now under way. Industries have already begun locating there; others are planning. This is the building time in Port Edward, the time to "get in." Send the coupon now; today, for complete information and data. Don't postpone it; do it now!

SALES TO DATE IN PORT EDWARD AMOUNT TO \$475,000. INDUSTRIAL INQUIRY PARTICULARLY STRONG. SEVERAL INDUSTRIES WILL LOCATE IN 1913.

Haydn's Masterpiece "The Creation"

will be given by the Combined Chorus of the First Presbyterian Church and the Strathcona Choral Society, numbering about 100 voices.

First Presbyterian Church, Thursday, 24th April.
Conductor: Mr. E. C. Cox.
Accompanist: Mr. W. H. Watts.

Metropolitan Methodist Church (South), Friday, 25th April.
Conductor: Mr. E. C. Cox.
Accompanist: Mr. W. H. Watts.

Admission 50 Cents. Commence 8.15 Sharp.

The Popular Music Store

(The Upstairs Store)

She loved him well, but the tunes he played
On an old accordion, left her soon dismayed.
And she heard a sigh, it can never be,
I love him dearly, but no such discards for me.
The young man was wise in the ways of love,
So he hid himself in the store above.
Better known as THE POPULAR MUSIC STORE,
Where music is sold at half-price and more.
He purchased an instrument with tone so sweet
That it swept the girl clear of her feet.
Now they are wed and so happy as can be,
So, young man, profit by the same ingenuity.

Popular Sheet Music Will be Sold Today and Tomorrow, Two Copies for 35c.

We also have a line of sheet music which has never been sold before in Edmonton.

For Musical Instruments at Rock Bottom Prices
See the stock of the Popular Music Store in the Second Floor of the New Bank Building.

101-102 Rudyk Block, 434 Jasper Avenue East

LATEST MARVELS IN WIRELESS MUSIC

A marvelous result of the invention of wireless telephony will be shown at the International Exhibition at about next summer. A steel mast, 240 feet in height, erected in the grounds will be in connection with a wireless station, and this will be in communication with the other houses at Rome, some 100 or 150 miles distant. Opera and concert music will thus be transmitted to Belgium. Along the main avenue of the exhibition will be erected masts, each fitted with telephone receivers, so that the "wireless music" may be heard in quiet.

MM. TEZARINI STRA DOLL OF DOLLS

Mme. Tezarini has never quite outgrown dolls, if reports concerning her some of Louisa, be true. There she has what is known as the "doll parlor," a room set apart for collection of dolls which she has gathered in her many travels. There are dolls that walk, dolls that talk, dolls that sing, and dolls that are made of wood, dolls that are made of china, dolls that are made of wax, dolls that are made of glass, dolls that are made of metal, dolls that are made of paper, dolls that are made of cloth, dolls that are made of leather, dolls that are made of rubber, dolls that are made of plastic, dolls that are made of stone, dolls that are made of wood, dolls that are made of china, dolls that are made of wax, dolls that are made of glass, dolls that are made of metal, dolls that are made of paper, dolls that are made of cloth, dolls that are made of leather, dolls that are made of rubber, dolls that are made of plastic, dolls that are made of stone, dolls that are made of wood, dolls that are made of china, dolls that are made of wax, dolls that are made of glass, dolls that are made of metal, dolls that are made of paper, dolls that are made of cloth, dolls that are made of leather, dolls that are made of rubber, dolls that are made of plastic, dolls that are made of stone, dolls that are made of wood, dolls that are made of china, dolls that are made of wax, dolls that are made of glass, dolls that are made of metal, dolls that are made of paper, dolls that are made of cloth, dolls that are made of leather, dolls that are made of rubber, dolls that are made of plastic, dolls that are made of stone, dolls that are made of wood, dolls that are made of china, dolls that are made of wax, dolls that are made of glass, dolls that are made of metal, dolls that are made of paper, dolls that are made of cloth, dolls that are made of leather, dolls that are made of rubber, dolls that are made of plastic, dolls that are made of stone, dolls that are made of wood, dolls that are made of china, dolls that are made of wax, dolls that are made of glass, dolls that are made of metal, dolls that are made of paper, dolls that are made of cloth, dolls that are made of leather, dolls that are made of rubber, dolls that are made of plastic, dolls that are made of stone, dolls that are made of wood, dolls that are made of china, dolls that are made of wax, dolls that are made of glass, dolls that are made of metal, dolls that are made of paper, dolls that are made of cloth, dolls that are made of leather, dolls that are made of rubber, dolls that are made of plastic, dolls that are made of stone, dolls that are made of wood, dolls that are made of china, dolls that are made of wax, dolls that are made of glass, dolls that are made of metal, dolls that are made of paper, dolls that are made of cloth, dolls that are made of leather, dolls that are made of rubber, dolls that are made of plastic, dolls that are made of stone, dolls that are made of wood, dolls that are made of china, dolls that are made of wax, dolls that are made of glass, dolls that are made of metal, dolls that are made of paper, dolls that are made of cloth, dolls that are made of leather, dolls that are made
